### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## DETAILED ACTION

### *Election/Restrictions*

1. Newly submitted claims 23-26 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 23-26 are method claims; whereas the claims originally presented and examined were directed towards an apparatus.

Examination of the method would necessitate further search and the apparatus could be used by a materially different process such as heating the apparatus as a whole at one temperature only.

2. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 23-26 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 2-4 and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Hedblom (U.S. Patent 5,676,488). Hedblom discloses a surface marking including resin, thermoplastic polymers, softeners, reflecting material, and friction material (see Table at column 16-17, for example). There are at least two layers (Figure 2, for example) including a wear layer (see abstract, for example) and a heat-activatable adhesive material (column 11, lines 18-23, for example).

Art Unit: 3671

*Allowable Subject Matter*

5. Claims 5-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The following is a statement of reasons for the indication of allowable subject matter: while wear indicators are common in certain devices, there is no teaching in the prior art that would have led one skilled in the art to have incorporated a wear-warning sheet into the apparatus of Hedblom.

*Response to Arguments*

7. Applicant's arguments filed 11/26/2002 have been fully considered but they are not persuasive. Applicant's arguments regarding the location of the adhesive relative to the roadway in Hedblom versus the present application are noted; however, this relationship is not positively recited, therefore, the arguments are moot. Each of the independent apparatus claims include the recitation, "for direct application and adherence to the fixed road surface." This limitation does not positively recite the adhesive-road surface application that is discussed in the arguments. In other words, there is no relationship between the adhesive and the road surface positively recited in the claims as presented; therefore, the arguments are moot.

*Conclusion*

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the Shivaram patents teaches a wear indicator in pavement.

Art Unit: 3671

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

10. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Will can be reached on 703-308-3870.
